Tax Technology Fair 2013

Dear Sir or Madam,

Working in tax or finance, you will be finding yourself under increasing pressure to deliver more tax accounting, compliance, planning and tax risk management information in a shorter space of time. More efficient processes and technology solutions can help you rise to this challenge. However, it can be difficult to keep track of the latest best practices and IT solutions on the market and understand the benefit each of them can bring to your organisation. The Tax Technology Fair can help you gain a quick overview of the best practices and solutions which can help you in your day-to-day business of managing tax.

While the morning sessions will cover tax risk management and technology in a general manner, the afternoon is dedicated to specialised areas within tax.

You will be able to choose one of three breakout sessions for a chance to hear experienced practitioners from around the globe talk about these topics and answer your questions. This year's Tax Technology Fair will give you insights into the latest tax technology solutions in relation to the following topics:

	Topics	Description
Morning session	Tax risk management	How can tax technology help you manage your tax risk management on a global basis
Afternoon sessions	Tax accounting and reporting	How to utilise best practices in tax accounting and reporting
	Indirect tax (VAT and customs)	Leveraging on SAP and Qlikview for indirect tax and INTRASTAT management and reporting The software IDEA: customs and trade topics in an international supply chain
	FATCA compliance	How technology can help you to run your FATCA compliance programme

A number of market leading PwC professionals and IT vendor representatives will make live presentations on their respective technologies and applications. During the event, you'll be able to compare solutions and speak with solution providers directly regarding your questions and issues in 1 to 1 sessions.

The Tax Technology Fair is a great opportunity to find out how the latest solutions can benefit your organisation and talk with people who face the same issues as you.

We look forward to seeing you there!

Christoph Schärer, Partner
Tax Technology Leader Switzerland

Laurenz Schneider, Director
Leader Tax Accounting Switzerland
